

INFORMATION GATHERING/ANALYSIS

PHASE 3 OF COMMUNITY-BASED
EVALUATION

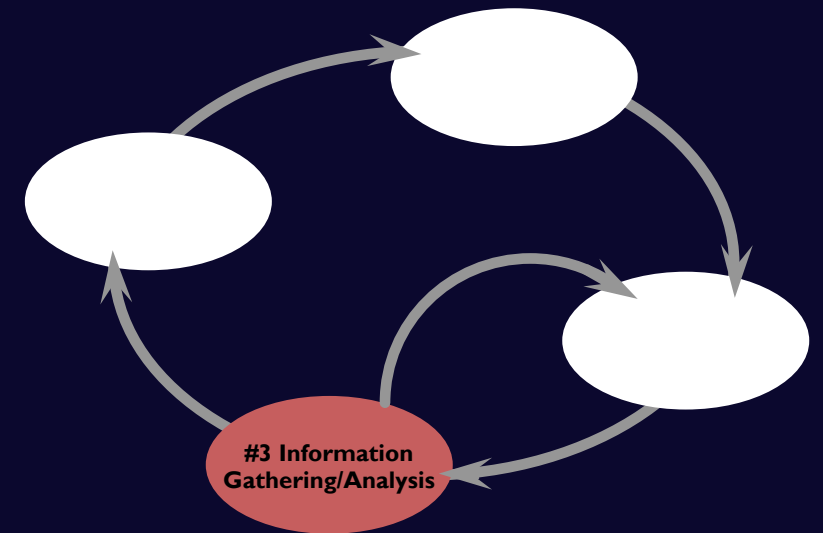

Funded by:

THE FOUR PHASES OF COMMUNITY-BASED EVALUATION

#3 INFORMATION GATHERING/ANALYSIS

- ✓ Gather information ethically
- ✓ Analyse & summarize information

DATA GATHERING

ENSURE THAT...

- Data is gathered according to the plan
- People are trained adequately
- There are regular meetings to reflect on how things are going and on your learnings
- Any issues are raised with the steering committee
- Pilot tests are run
- Ethics is considered and followed

ETHICS

WHAT IS ETHICS IN EVALUATION?

- Do no harm—both on an individual and community level
- Free, prior and informed consent
 - ✓ People must be aware of the purpose of the evaluation
 - ✓ People need to freely agree to participate upfront
- Throughout the evaluation process, one must:
 - ✓ Protect all stakeholders involved (especially the vulnerable)
 - ✓ Be aware of who is (or will be) using/accessing data
 - ✓ Recognize power dynamics, problematic relationships and ulterior motivations

ETHICS

BEING TRAUMA-INFORMED AND CREATING SAFETY

- ✓ Building relationships of trust and mutual-accountability
- ✓ Including and learning from experts in trauma-informed practice
- ✓ Building researcher awareness and recognizing signs of trauma
- ✓ Appropriately responding through the integration of trauma knowledge, policies, practices, and procedures
- ✓ Actively resisting re-traumatizing practices
- ✓ Prioritizing safety at all steps of research and engagement with community partners

(Andrews, Pepler & Motz, 2019)

THREE MECHANISMS FOR ETHICAL PRACTICE

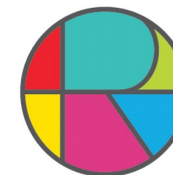

1. The steering committee plays an ongoing role in discussing ethical issues
2. Community researchers provide their lived experience to the evaluation team
3. Formal ethics review through CREO ensures the evaluation does no harm and maximizes benefits to the community

COMMUNITY RESEARCH ETHICS OFFICE (CREO)

- Does ethical review for community-based research
- CREO mission is to strengthen and support community research by responding to the needs of community researchers to easily access an ethical support and review process.

- CREO's four core principles are

Respect for Persons
Concern for Welfare
Concern for Justice
Respect for Community

COMMUNITY
RESEARCH
ETHICS OFFICE

ANALYZING & SUMMARIZE INFORMATION

WAYS TO ANALYZE INFORMATION

Perform content analysis
with qualitative data

By method
What does each method say about the main research questions?

Perform statistical analysis
with quantitative data

By stakeholders
What does each stakeholder group say about the main research questions?

WAYS TO SUMMARIZE INFORMATION

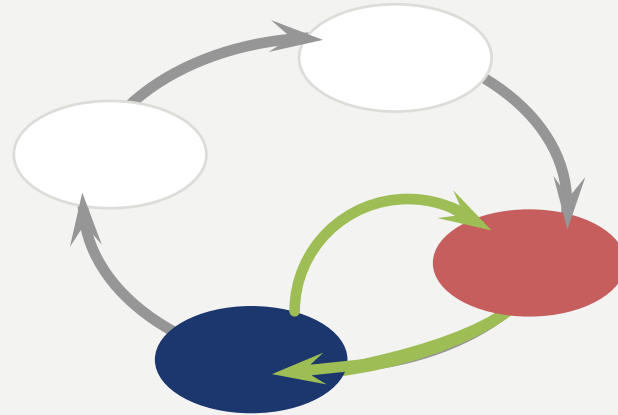

Across methods

Across stakeholders

BE OPEN FOR THE UNEXPECTED

COLLECT

data according to the plan that was developed

CONSULT

with the steering committee if any changes are needed regarding the collection or analysis of the data

ADJUST

as necessary
